

WEEKLY

WATER QUALITY TEST

PROCEDURE

Before you start this procedure ensure you have a full understanding of the required COSHH data sheets and relevant risk assessments. Ensure you are wearing the correct PPE for this task.

STEP 1 - TAKE THE READINGS

- Take a sample bucket of water from the bath at a depth of 30cm
- Take a temperature reading
- Take a TDS reading using your preferred meter
- Take a TOTAL ALKALINITY reading using your preferred meter
- Take a pH reading using your preferred meter
- Take a calcium hardness reading using your preferred meter

STEP 2 - RECORD THE FINDINGS AND TAKE ACTION

- Record the findings on the weekly test record sheet and work out the water balance.
- If the reading is outside of the acceptable balance dilute the water in the bath until an acceptable level is found
